

AndroForte® 5 scrotal is Australia's most affordable testosterone therapy

AndroForte® 5 is indicated for use as testosterone replacement therapy for male hypogonadism when testosterone deficiency has been confirmed by clinical features and biochemical tests.

Why Switch to Scrotal?

Better Absorption

80% scrotal vs 10% upper body¹

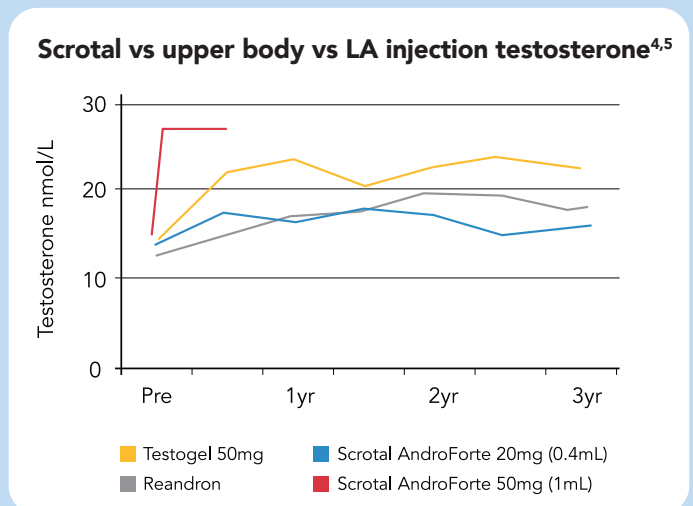

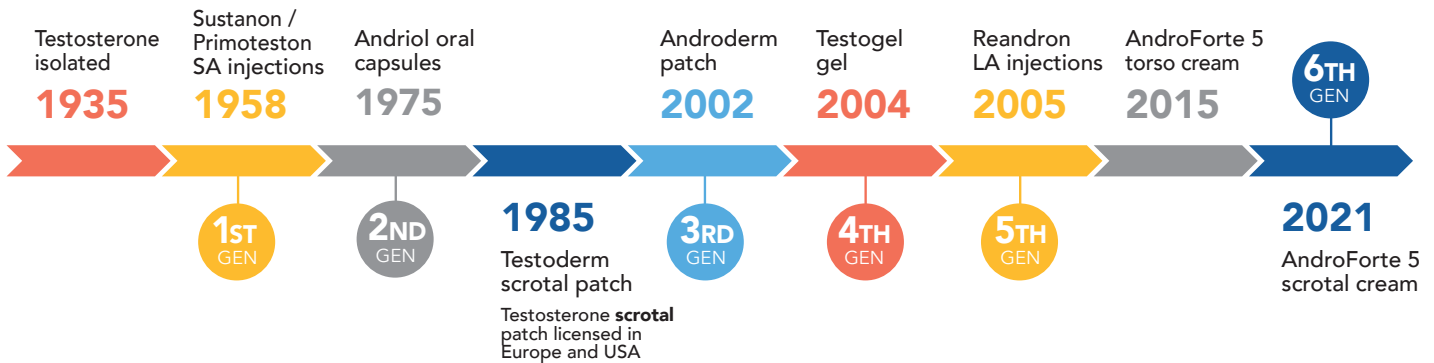

Lower Dose

0.5ml vs 5ml^{2,3} = <90% volume

Better Price

70% savings^{2,3,Δ} to patient / PBS

Private script cost per month	\$31.85	\$127.50
PBS status and price per month	PBS Authority General patient \$12.39 Concession \$1.98	non-PBS

Switching to Scrotal

T gels cannot be applied to genital areas because high alcohol content, may cause scrotal irritation.³

Injection - T levels at trough or return of symptoms

Topical - No washout period required

Scrotal Dosing

Recommended starting dose is 25mg (0.5mL).

Titrate up or down by 12.5mg (0.25mL) increments following serum blood test, if required.

Two serum testosterone levels should be taken at 3 hours (peak) and 24 hours (trough) after the 15th day of starting treatment.

Do not exceed 50mg (1mL) dose per day.

The scrotum is not required to be shaved prior to application.

PBS Information: Authority required for scrotal application.
Application to the torso is non-PBS. Refer to PBS Schedule for full information.

Indication: AndroForte® 5 is indicated for use as testosterone replacement therapy for male hypogonadism when testosterone deficiency has been confirmed by clinical features and biochemical tests.
